Personal Summary

After obtaining a Technical Diploma, I began my career in an Engineering Studio as an Electric Industrial Engineer, focusing on the design of electrical and photovoltaic systems. Driven by a passion for IT, I pursued a degree in Computer Science and transitioned into a role as a Software Engineer. Over the years, I have cultivated a diverse skill set through 10+ years of experience across various engineering disciplines, progressively advancing to my current role as a Solution Engineer & Tech Leader. I am a highly motivated, collaborative professional seeking to contribute to an innovative and forward-thinking company.

Areas of expertise

- ➢ Ecommerce platforms (mostly VTEX, Salesforce Commerce Cloud and Shopify);
- ➢ Solution Architecture, Design and System Integration;
- ➢ APIs and Microservices;
- ➢ Software development (JavaScript ecosystem, Node.js. React, Next.js, etc.);
- ➢ Problem Solving and Analysis;

Professional Experience

⊙ **Solution Engineer & Tech Leader** April 2025 - Current
Arsenalia UK, London

- Lead solution engineering and architecture activities across the full project lifecycle, from pre-sales and opportunity qualification through discovery, solution design and implementation;
- Collaborate with clients and internal stakeholders to understand business objectives, identify technical requirements and define appropriate technology solutions;
- Drive technical discovery, requirements analysis, solution scoping and effort estimation for new business opportunities and ongoing projects;
- Develop technical proposals, RFP responses, solution architecture documents and presentations to support sales opportunities and client engagements;
- Evaluate technology options and architectural approaches, balancing business requirements, technical feasibility, scalability, maintainability and total cost of ownership;
- Lead technical workshops and discussions with clients, translating business requirements into functional and technical specifications;
- Act as a technical point of reference across clients, project teams and stakeholders;
- Identify technical risks, dependencies and opportunities for improvement, defining mitigation strategies and recommending pragmatic solutions;
- Contribute to the evolution of internal technical standards, best practices, reusable assets and solution delivery methodologies.

Principal Solution Engineer Sep 2022 - January 2025
VTEX Ecommerce Platform Limited UK, London

- Designed and implemented tailored technology solutions to meet client requirements;
- Collaborated with clients to understand their business challenges and technical needs;
- Developed proof-of-concept (POC) solutions to demonstrate feasibility and value;
- Acted as a subject matter expert (SME) for internal and external events;
- Provided in-depth product demo and technical presentations to clients and partners;
- Worked with sales teams to identify and qualify opportunities;
- Delivered technical proposals, RFP, and solution architecture documents;
- Led technical discussions and answering client queries during the pre-sales phase;
- Provided feedback to product development teams for product enhancements;
- Contributed to the creation of internal best practices, tools, and reusable assets;
- Trained clients and internal teams on deployed solutions;
- Stayed updated on the latest technologies, trends, and tools in the industry;
- Mentored junior engineers and team members;
- Acted as a bridge between sales, engineering, and customer success teams;
- Ensured alignment between technical deliverables and client business objectives.

Senior Solution Engineer Nov 2020 - Sep 2022
VTEX Ecommerce Platform Limited UK, London

Senior Software Engineer Oct 2018 - Sep 2020
Inviqa UK Ltd UK, London
